CHOOSING NAMES FOR

If you are cudgelling your brain for a sultable name for your son and have any expectation of his being President of the United States, don't bandicap him by bur-dening him with more than one given name. Of the twenty-six Presidents of name. Of the twenty-six Presidents of the United States nineteen have had only two names each, while seven carried the

It is a significant fact that while three

weight of three names.

It is a significant fact that while three deckers in nomenclature have risen to the highest office in the gift of the people there has never been a case of a four decker rising to this pinnacle of fame, although people have risen to great eminence in the common walks of life with four and even five initials to their names. Anyway, the facts in the case are that most of the successful aspirants for the Presidential chair have suiled under close rected topsalls.

Another fact is that Presidents of the United States who have had three names were never re-elected—except in one conspicuous instance, that of Gen. Ulyses Simpson Grant. Those having a frilogy in their names who failed to be re-elected were John Quincy Adams, the first President with a triple name; William Henry Harrison, who died after having been in office only a short time; James K. Folk, Rutherford B. Hayes, James A. Garfield, who was assussinated, and Chester A. the was assussinated, and Chester A.

Arthur,
On the other hand, of the nineteen

or nearly half, were elected to this high office a second time. Viewed from, the point of time one finds pienty of warning against carrying too much headgear for those intending to enter the troubled waters of politics. From George Washington down to the election of Theodore Roosevelt, a period of 116 years, it is found that for twenfy-eight years of this period the Presidential chair was occupied by men bearing three names, while during the remaining eighty-eight years the place was kept warm by men bearing only two names.

Wherefore let it be known to all parents blessed with baby boys that if they cherish hope of their ever becoming Presidents of the United States, chances of a realization of these hopes will be increased by a curtailment of their names.

You are in error. Senator Daniel has worn a silk stove-pipe hat. Numerous citizens who called on Senator Daniel at the Richmond carly in the evening of the night he spoke at the Academy, during the recent campaign, will recall that he wore a silk stove ripe hat in the looky of the hotel, and that when in went from the hotel to the Academy he wore the silk stove-pipe hat.

The innovation was commented on at the time. Some of those who had known him for many years did not like the change from a slouch hat to a silk stove-pipe hat. I remember that one pan remarked after his speech that not until Senator Daniel appeared on the rostrum without his silk stove-pipe hat did he teel that it was the Daniel of old.

However, it is true that John W. Daniel and the shouch hat, to the people of Virginia, are as inseparable as were Ruth and Naomi.

FUTURE PRESIDENTS GUYS LAUGHED AT

A Very Good Story That Is Probably Located in Wrong Place.

Francis B. Loomis, assistant secretary of state, who was at the Albermarie over Sunday, related the following election story, says the New York Globe:

ton I got into conversation with a man who is a manufacturer in Lynchburg, and a stuunch Republican. On the night after the election ho gave a suppor to celebrate the Republican victory to his workmen, some 300 in all.

"I asked my foreman, he said, in telling the story, 'to arreside at the eather.
